

GDI+ 1.0

by Stephen Rodriguez

BitmapData Class

General.

Our GDI+ BitmapData class is housed within the "gdiPlus_BitmapDataClass.pbi" source file.

The class contains elements of the following c/c++ classes :

BitmapData

This is a *helper-class* containing just a single macro :

gdiPlus_BitmapData(name, width, height, bytes, format, scan)

This macro simply fills out the fields of a BitmapData structure whose fields can be seen in the "gdiPlus_Header.pbi" file.
